WHAT DO YOU MEAN "THIS IS NOT APPROPRIATE!!"

IT'S TRAINING FOR YOUR STAMINA. MORE SPECIFICALLY, SEXUAL STAMINA. IF THE ENEMY TRIES TO CONTROL YOU THROUGH YOUR SEXUAL ATTRACTIONS, THEN YOU WILL EASILY BECOME THE TARGET OF ENEMY ATTACKS. SO FIRST I WANT TO TEST YOUR EJACULATION ENDURANCE SO I CAN PRESCRIBE THE RIGHT TRAINING PROGRAM FOR YOU.

SO STOP ASKING YOURSELF THAT QUESTION AND STICK YOUR DICK IN MY PUSSY! ♥

"The Blades of the Silver Sepulcher"

A young chapter born of the ultima founding that have made the Arkylius System within the Tempus Pacificus their home. Situated within their fortress monastery on Eidora Quintess, the Blades were introduced to the Eidorian obsession with stone and silver craft along with their reverence for the fallen. Vaste mausoleums of rock, silver and precious gems dot the surface of the planet, filled with the fallen nobility and those of the populace who earned the right to have their visage preserved in perpetuity.

Inspired by this devotion and the artistry of their craft, the Blades incorporated the practice on their own armor and vehicles; faces of fallen brothers and allies lovingly rendered in stone with silver ivy on their battle plate, watching them as they defeat the foes of the emperor.
The Blades will not suffer damage to these depictions lightly, initiating honor duels amongst less respectful chapters and flying into a rage against foes who have damaged their work.

Self-styled blade masters of Dorn's lineage, the Blades prefer to draw their sabers and falchions (the customary weapon of their adopted world) and rush the enemy. In this, they believe they are protecting the people and objectives at their back while ensuring the defensive line is moving ever forward to the enemies throat.

YUKI
MAKE SURE TO TICKLE HER THOROUGHLY, SO SHE LEARNS HER LESSON PROPERLY

I HOPE YOU'LL NEVER CHEAT AGAIN, ALYA-SAN! (WINK-WINK)
^_^

I CAN FEEL HER SKIN TREMBLING UNDER MY FINGERS!

JUST EAT YOUR STOCKING IF YOU WANT TO SAY SOMETHING

HER FEET ARE SO SMOOTH AFTER YUKI-CHAN WASHED THEM WITH SOAP!

AS IF THE TICKLING WASN'T ENOUGH, A THICK VIBRATOR WITH BULGING VIBRATING BALLS ENTERED HER PUSSY
QINGYI HAD NEVER EXPERIENCED ANYTHING LIKE THIS BEFORE
AN ORGASM, AMPLIFIED MULTIPLE TIMES BY HER HEIGHTENED SKIN SENSITIVITY, STRUCK HER NERVES LIKE A POWERFUL ELECTRIC SHOCK
HER EYES ROLLED BACK, HER ENTIRE BODY TIGHTENING INTO A SINGLE, PULSATING KNOT OF ECSTASY
IN THAT SAME INSTANT, THE TICKLING FELT EVEN MORE INTENSE THAN BEFORE, TAKING ON A STRANGE, UNFAMILIAR UNDERTONE OF LUST THAT QINGYI HAD NEVER KNOWN

SYSTEM BAR STATUS\LEVEL
SENSORY MODULE
Tactile Sensitivity 85%
Ticklishness Threshold HIGH
Neurological Feedback ACTIVE
ACTUATORS
Mechanical Hands ACTIVE
Micro-Pulse Emitters ACTIVE
Rotary Brushes ACTIVE
SYSTEM METRICS
Stress Level ELEVATED
Stable data transmission STABILITY
Power Draw 47%
TARGET ZONES
Feet
Underarms ACTIVE
Ribs ACTIVE
Sex zone ACTIVE

THE MOST TERRIFYING THING ABOUT THIS CHIP WAS THAT THE SENSITIVITY OF THE ARTIFICIAL SKIN COULD BE INCREASED INFINITELY, A HUNDREDFOLD, A THOUSANDFOLD, WITHOUT HARMING THE BODY'S FUNCTIONS OR THE BRAIN CORE
MOREOVER, THE SENSATIONS NEVER DULLED, CONSTANTLY REMAINING AT THE PEAK OF THE SET SENSITIVITY
IF QINGYI COULD SPEAK, SHE WOULD HAVE AGREED TO ANYTHING, JUST TO STOP THE ENDLESS CYCLE OF ORGASMS AND TICKLING
BUT EVEN THAT POSSIBILITY WAS TAKEN FROM HER
SHE COULD ONLY WRITHE SILENTLY IN TICKLISH AGONY, WAITING FOR THE TORTURE TO FINALLY CEASE.

Zhu
WHAT THE... SARAH?!

MECHANICAL CLAWS DIG INTO THE SWEATY, REDDENED AFTER LONG HOURS OF TICKLING ARMPITS, INTO THE SENSITIVE RIBS, SIDES AND STOMACH, THE ROBOTS EXPLORE HER BODY, SEARCH FOR THE MOST VULNERABLE SPOTS, HOUR AFTER HOUR, UNTIL THE SQUEALS TURN INTO SOBS, UNTIL THEY DRIVE HER INSANE...
BUT THIS PERVERT DOESN'T SEEM TO MIND AT ALL!
MOREOVER — SHE LOOKED ALMOST DISAPPOINTED WHEN THE ROBOTS FINALLY STOPPED FUCK HER

AAAAA!
AND FINALLY, AFTER HUNDREDS OF HOURS OF TRIALS AND ERRORS (AND TICKLING OF KOLEDA), GRACE MANAGED TO CREATE FUNCTIONING COMBAT ROBOTS - GUARDIANS AND IMPARTIAL TORMENTORS THAT KNOW NEITHER PITY NOR SHAME
AND THE FIRST ONE TO TEST THEIR ELECTRIC STEEL CLAWS ON WAS GRACE HERSELF

I WILL TORTURE YOU UNTIL YOU BECOME A WHIMPERING DOLL, READY TO DO ANYTHING AND BETRAY ANYONE JUST TO MAKE YOUR SUFFERING STOP!
BUT YOU'LL BREAK MUCH FASTER, I THINK..
IF IT WEREN'T FOR THE GAG, YOU'D PROBABLY BE BEGGING TO BECOME MY GUIDE ALREADY!

AFTER AN HOUR OF INTENSE TICKLING, CANDIDATE ALICE KUJOU APPEARS TO BE ELIMINATED FROM THE CONTEST!
SHE MUST NOW BECOME YUKI SUOU'S SLAVE UNTIL THE END OF THE SCHOOL YEAR!
JUST KIDDING!

CONGRATULATIONS TO THE NEW STUDENT COUNCIL PRESIDENT, YUKI SUOU, ON ASSUMING OFFICE!
THIS IS HER FIRST VICTORY AMONG HUNDREDS OF FUTURE TRIUMPHS THIS YEAR, AND SO ON!
WE LOOK FORWARD TO SEEING YOU AT NEXT YEAR'S CANDIDATE TRIALS!

Yuzuha
AAAH!!! THE WHEEL BETWEEN MY LEGS STARTED SPINNING!! THIS IS NOT FUNNY ANYMORE! STOP IT! PLEASE!

Vivian
YOU'RE DRENCHED IN BELLE'S SCENT... OH, MY INCOMPARABLE LORD PHAETHON! YOU FEEL SO CLOSE, YET SO FAR FROM ME RIGHT NOW! I KNOW... I KNOW HOW TO MAKE YOUR FRAGRANCE EVEN STRONGER! IF... IF I TICKLE HER JUST RIGHT...

Yuzuha
AHA-HA!!! NO, STOP, CUT IT OUT! I HATE BEING TICKLED! JUST WHO THE FUCK ARE YOU-HAHAHA!!!

Vivian

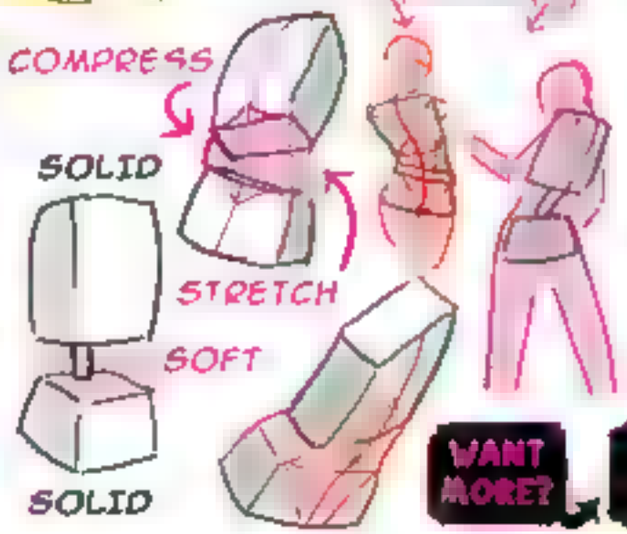
TUTORIAL #848

TWISTING POSES

PART 8

WE CAN ALTERNATE OR MIX TWIST DIRECTIONS BETWEEN THE HEAD, TORSO, PELVIS, LEGS AND FEET.

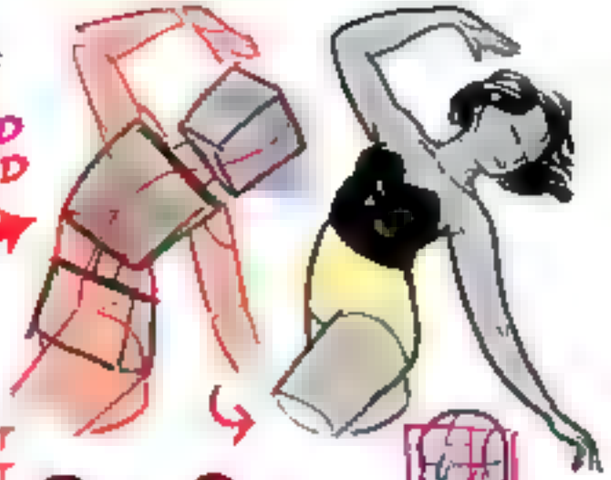
THE RIBCAGE AND PELVIS ARE SOLID, SO ALL THE STRETCH AND COMPRESSION COMES MOSTLY FROM THE STOMACH AND LOWER BACK.



POSES WITH A TWIST CAN BE FURTHER EXAGGERATED BY ADDING BEND OR TILT.

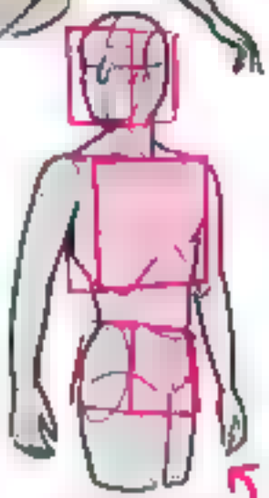
TWIST ALONE

TWIST + TILT



TORSO TWIST IS OFTEN A SECONDARY ACTION. THE TWIST FACILITATING A BROADER RANGE OF MOVEMENT FOR THE PRIMARY ACTION.

TORSO FOLLOWS HEAD



IT CAN BE SUBTLE

PICTURING A SHEET OF FABRIC WITH OVERLAP FROM ONE SIDE TO THE OTHER IS GOOD A WAY TO UNDERSTAND THE CHANGING PLANES.

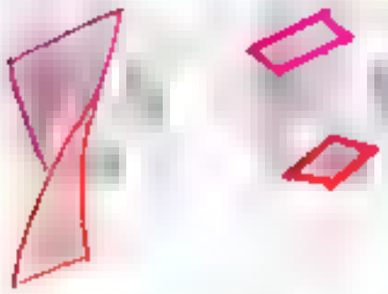
TWISTING POSES PART A

ADDING A **TWIST** TO OUR CHARACTERS' POSES INCREASES OUR SENSE OF THE **FORM**, AND ADDS A **DYNAMIC** AND **INTERSTING THROUGH-LINE** TO THE **GESTURE.**



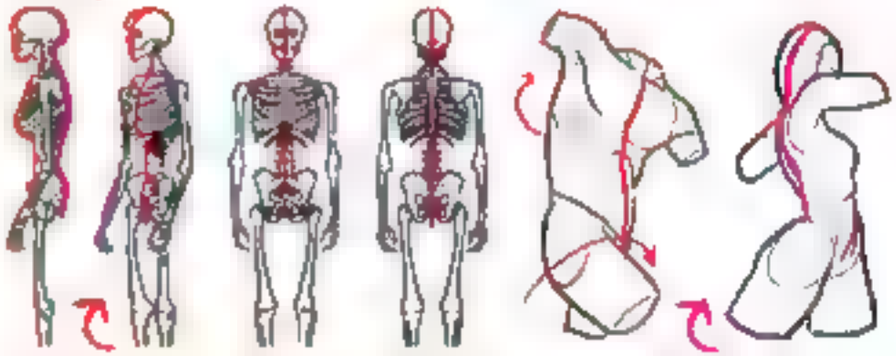
FOR **MOST PEOPLE** THE **TORSO** CAN **ROTATE** BETWEEN **45 - 70 DEGREES.**

THE **HEAD** CAN **ROTATE** BETWEEN **70 - 90 DEGREES**

LEG/FOOT ROTATES 50/90+ DEGREES

THOSE **DEGREES OF ROTATION** ADD UP TO A **WIDE RANGE OF MOTION,** MEANING THE **FOOT** AND THE **HEAD** CAN BE FACING IN **OPPOSITE DIRECTIONS.**

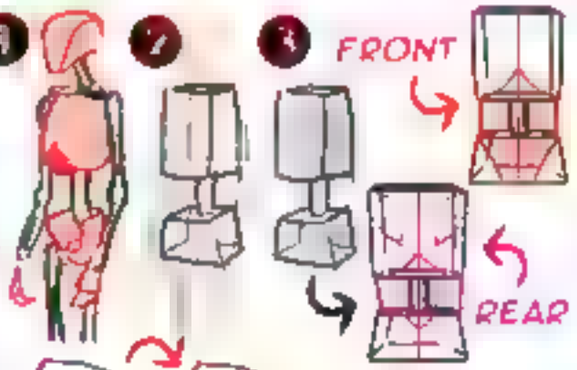
A GOOD WAY TO HELP YOU **SEE** THE **FLUIDITY** OF A **TWIST** THROUGH THE **BODY** IS WITH FRONT AND REAR **CENTRE LINES.**



IMAGINE A CENTRE LINE ON BOTH THE FRONT AND BACK

AIDS US IN MAPPING TWIST

DRAWING THE **RIBCAGE** AND **PELVIS** AS **BLOCKS** WILL HELP US KEEP THE **DEGREE OF TWIST** BELIEVABLE



KEEP **TWIST** UNDER **70°**

从中世纪至18世纪，“鞭刑”已成为欧洲各国对女同性恋的标准惩罚方式。受刑者会被绑在木桩上，脚被锁在木枷中，任由居民们无情地鞭笞。而挠痒痒是居民们最喜欢的一种调教方式。尤其是被指控卖淫的受刑者。父债债偿的人妻，当初的顾客，以及好起哄参热闹的人们会排成队，等待着轮到他们去挠那个轻贱的骚货。

挠脚心在18世纪的俄罗斯贵族女性中非常流行。这种玩法是从亚洲边境的部落那里学来的，主要被当做一种堕落的性前戏手段。安娜·伊凡诺芙娜有一支多达六人的全职挠脚丫工团，她们凭借其高超的调情天赋获得了丰厚的报酬。据传，她们的技巧对女皇的影响力是如此之大，以至于可以贿赂她们去“说服”这位无可救药的拍马君主，去处理最令人厌倦的公务。

CASE # 27 | Jan Doe

I named her Jane Doe. She was admitted to Laughing Falls with a rare form of amnesia that inhibits the brain's ability to store information. Therefore the patient lives in a real time dream state. Without even momentary short term memory her consciousness was defined by a continuous stream of tactile sensations and reflex responses. We also discovered that her Bobinsky response was off the chart, indicating that her feet were intensly ticklish. I immediately realized that her unique condition would make her a perfect subject for my tickle response research so I had her transferred to my private lab.

As anticipated she was the perfect subject for my research. Her lack of cognitive retention meant that I could literally tickle her for hours and her reactions remained pure and uninhibited and the sensations she experienced did not loose their novelty. Needless to say I became just slightly obsessed with my new tickle toy.

Yes, Laugh your pretty head off my dear! . Kichy Kichy Kooo Kichy Kichy Koooo.....

HAHAHAHA

Her feet were truly remarkable and our nightly sessions would often last until the wee hours of the morning.

HAHAHAHA

HAHAHAHA

Tickle Tickle Tickle... How about these special spots on your delicate arches? This is quite possibly one of my favorite techniques. How About You?...

I conducted much of my early research on Jane and I made many interesting discoveries with her help. There are those that would pity poor Jane and say that my overt exploitation of her condition was cruel and inhuman torture. But then again these would be people who can't appreciate the beauty of a creamy white sole and the music of unbridled laughter. And when all is said and done, it's those people that I pity!

BORIS WAS ONE OF MY FIRST CUSTOMERS.

WHEN I WAS STILL WORKING SOLO WITH A BUNCH OF FEATHERS.

GOOD OLD BORIS SPENT A FORTUNE TO PLAY WITH ME.

THAT TERRIBLE TONGUE OF HIS DROVE ME CRAZY. POOR TILLIE, JUST LOOK AT HER. SHE'LL GET A SKIN SMOOTHER THAN A BABY'S AFTER BEING PLAYED BY THEM.

FOR STARTERS LAMAR WILL BE BRUSHING UP ON HIS BARE SOLE TECHNIQUES AT YOUR LOVELY LEFT FOOT!...

...WHILE FOO LIN, AT YOUR RIGHT FOOT, IS GOING TO TEST THE EFFECTS SILK STOCKINGS HAVE ON THE SOLES TICKLE RESPONSE.

AND OF COURSE LAST BUT NOT LEAST I WILL TRY MY HAND AT YOUR ARMPITS, RIBS AND THIS DELICIOUS BELLY! SHALL WE BEGIN?

NO WAIT!..

AAKAHAHEEHEEE

SOLES A LITTLE WELL DONE! — BRUNO, I THINK MY PETS WOULD FIND MAMADY'S SOLES TASTIER IF THEIR TENDER FLESH WAS GLOWING A BLUSHING SHADE OF CRIMSON, WOULD YOU MIND TENDERIZING HER PRECIOUS FEET FOR OUR HONORED DINNER GUESTS!

His skillful fingers worked her taught rib cage like a pianist lost in some wild concerto and she cackled in bursts of oxygen starved belly laughter. Just as she felt as though she might faint, the tickling stopped.

"I truly enjoy this." He bellowed over her panicked gasps for breath. "Especially this next part." He moved his stool and his instrument cart to the foot of the table then made himself comfortable in front of her slippered feet.

"These slippers are lined with the finest Tibetan Yak fur. They are designed to cause the feet to perspire. Perspiration moistens the skin, making it more receptive to tactile stimuli and creating a perfectly intoxicating bouquet." He removed the right slipper exposing her perfect foot to his hungry gaze. As her toes wiggled in the cool basement air, he brought his nose to the cringing digits and inhaled as if he were smelling the cork of a fine wine.

"Excellent." He sighed. Then removing the left slipper, he repeated the ritual with similar enthusiasm. "You have the feet of a Goddess, perfect in shape and form. Not a trace of earthly wear. Just plump, satin-smooth flesh. Perfect for the tickle torture!"

"No please... No, not my feet..." She whimpered in obvious panic, her pulse and her mind racing.

"Oh yes, especially your feet. Foot tickling is my own special passion. I have elevated it to an art form. It's rare that I get a pair of such perfect pallets on which to practice my art."

He selected the same duo feather brushes he had used on her breasts and positioned one at each foot. He parted the feathers of each brush with the outer edges of her feet. One feather caressed the tops of her feet while the other lightly kissed her smooth arches.

"Kichy kichy koo." He taunted as he fluttered his fiendish feather brushes up and down. From the balls of her foot to just above her heels, the bottom feathers tickled her delicately wrinkled arches as the top feathers tickled the smooth skinned tops of her foot.

She howled in great laughing protests at the feathers first touch. The tickling sensations at her feet shot through her body like bolts of lightning. She bucked and strained in her bondage but there was no escape from the maddening feathers that gently tickled her arches and insteps.

Her feet twitched in involuntary reflexes and her toes flexed and fanned pawing the air in spastic gyrations. This delighted Erik Toe. He worked his feathers so as to maximize this entertaining reaction.

"Who would guess that such an innocent act could be such maddening torture? Your feet are more ticklish than I could ever have hoped for. It is quite obvious to me that I have discovered your weakness. You will crack eventually. They all do!"

Wild helpless laughter was her only response. All that had come come before was tame compared to the torment of his persistent foot tickling. He continued feathering her feet in this manner for close to a quarter of an hour before allowing her to rest.

"Your lovely agile toes dance to the rhythm of my feathers and the music of your laughter. They please me. I will tickle them next!"

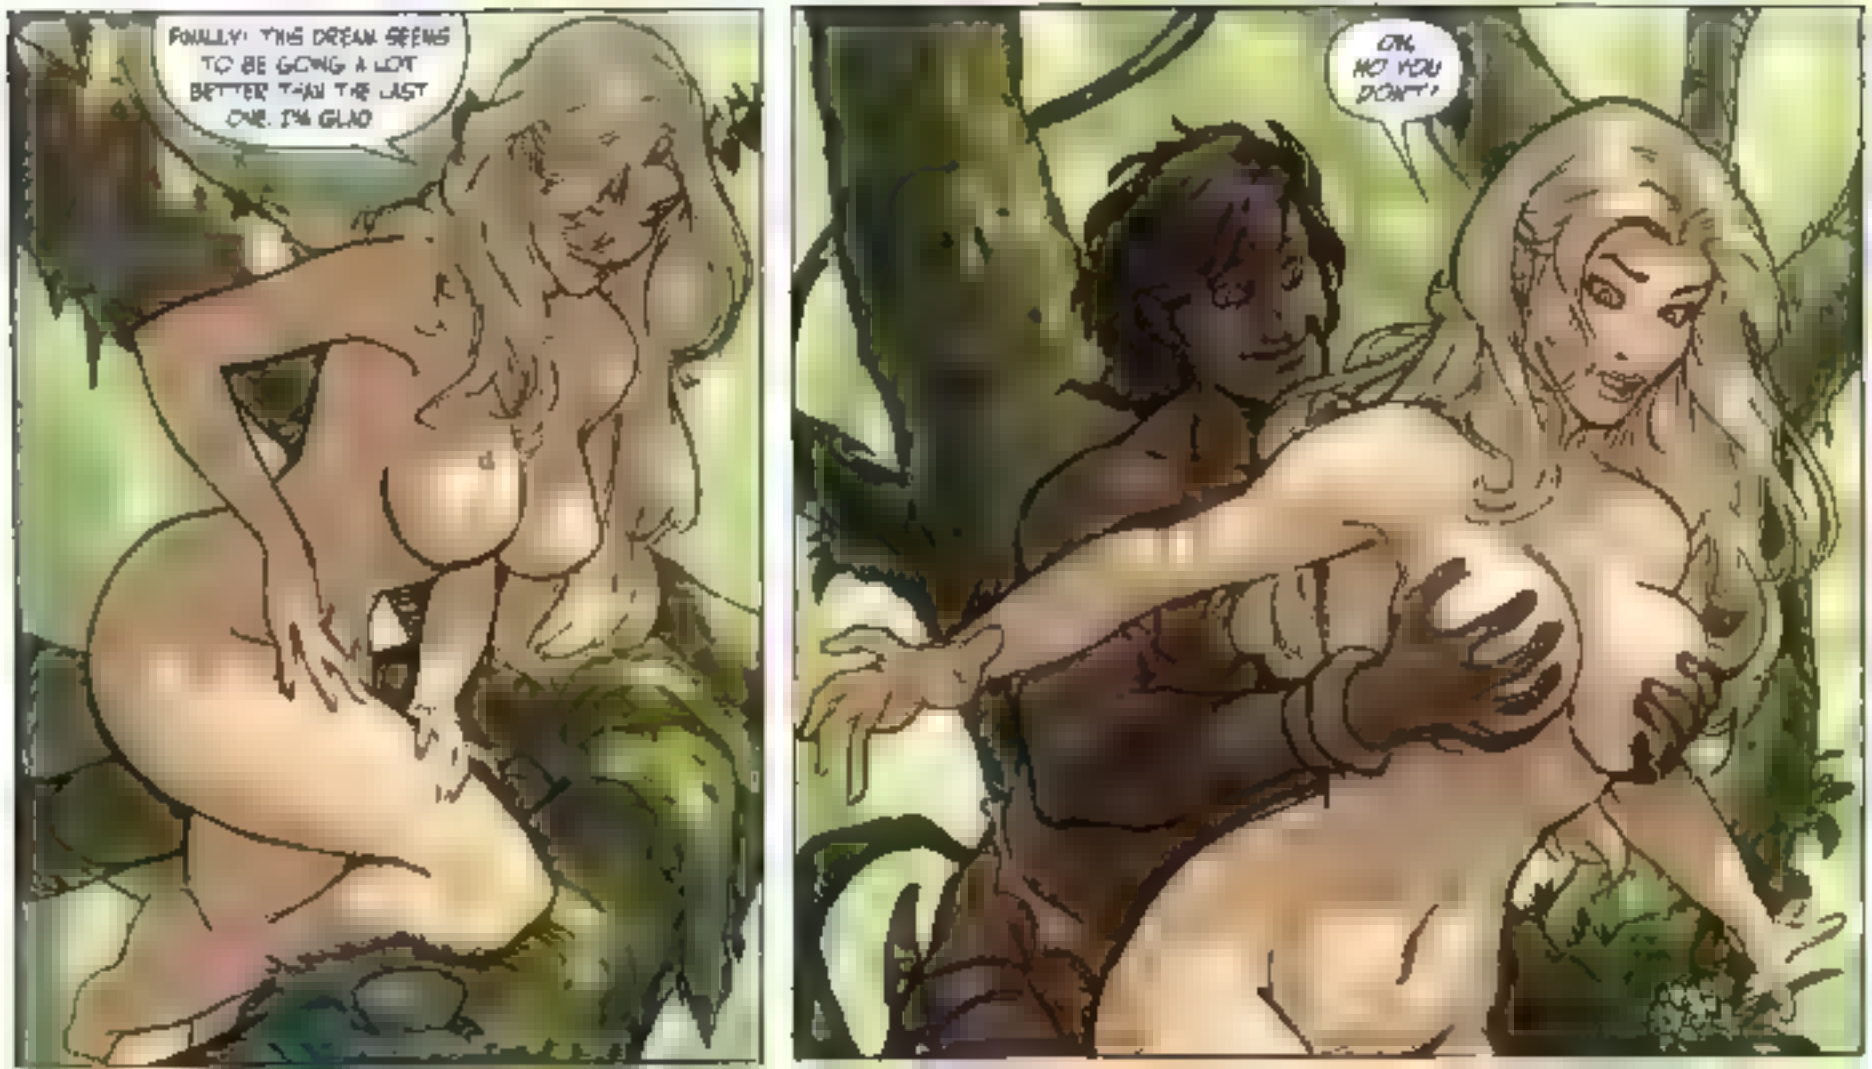
To Constance: what were your thoughts on the hunky jungle boy you encountered are you still dating him or have you moved on to explore different avenues

Reply

What he and I have is definitely a fling.
Though technically we were never “Dating.”
That being said…
I’m not married,
so while I am exploring avenues…
He and I are still a
ring a ding thing of a fling.



FINALLY! THIS DREAM SEEMS TO BE GOING A LOT BETTER THAN THE LAST ONE. I'M GLAD

Creature — Merfolk Wizard
When Thassa's Oracle enters the battlefield, look at the top X cards of your library, where X is your devotion to blue. Put up to one of them on top of your library and the rest on the bottom of your library in a random order. If X is greater than or equal to the number of cards in your library, you win the game. (Each {U} in the mana costs of permanents you control counts toward your devotion to blue.)

Heh, as you can see, that serum completely neutralized her indefinitely. I'd call the trial a success. The big bad vampire lady, is now just a lady. Maybe someday she'll be of more use to us, but for now, it seems that the others are enjoying themselves.
Oooh haha! Did I push the speed button? You make the cutest sounds when my finger goes in here. How's the view, Ethan?
Mmm, who knew the big bad Lady Dimitrescu was just a sickish little lady after all? And look how pampered her feet are under those shoes. You wanted me to play with them all along, didn't you?
These things boobed up to her nipple maybe I'm getting to her. They sure are packing up. Anyway all this fun has me working up an appetite. How about some R&R? Dig in!
Alright, I admit it. This is a lot more fun than I thought.
Just perfect.

I had fun making music again after 3 years.

Took the challenge a week late,but I dropped a 1 min reels every other day and was an amazing journey.

Love making music on characters, check out my page and let me know of character ideas.

My current list:

@Jayzn The Finite Tap to see attachment

Fenrir, Cryptek Verminlord
Of those that I've read I would rank them:

7. Silent King
8. The Lion
9. Alpharius
10. The Fall of Cadia
11. Severed
12. Betrayer
13. The First Heretic

Added note that both the Carcharadons and World Eater Omnibus have been recommended to me but have not gotten to them yet. Only Silent King got any real negative from me, and as I think I noted you have more affection for the blueberries so are likely to enjoy it more than me.

First Heretic and Betrayer still rank in my top 10 so easy first rec

The fuck, auto correct messed up my numbers. Whatever, bottom to top. (edited)

In this sci-fi comedy, Peterson played a supporting role that included a brief tongue-in-cheek scene typical of early 1980s humor. The moment, playful rather than explicit, showcased her comedic timing and fearless approach to physical comedy, in line with her later Elvira persona.

Here's a comparison of a **30-year vs. 50-year mortgage** on a $400,000 home with 20% down at 7% interest:

Term (Years)	Monthly Payment ($)	Total Interest Paid
30	2,128.97	446,428.47
50	1,925.40	835,241.83

✅ **Key takeaway:**
The 50-year loan cuts the monthly payment by only about **$200**, but adds nearly **$390,000 more in interest** over the life of the loan. (>-)

The Market Hustle
StackLedger.io

Trump recently proposed 50-year mortgages.

The idea: Lower monthly payments so more people can afford homes.

The reality: You'd pay the bank nearly TWICE as much in interest.

Here's the math on a $415,200 home at 6.34%:

30-year mortgage = $514K in interest
50-year mortgage = $959K in interest

You'd pay an extra $445,000 in interest.

The real winners of a 50-year mortgage is the banks.

TWO GREAT NOVELS OF ADVENTURE IN SPACE AND TIME

GODDESS OF THE MOON . . . . . John Murray Reynolds 2
Death hid behind a smile in the white-and-gold lunar city of Gral-Thala. But Gibson, adventurer in space, knew that if he died the Good Green planet perished with him.

DICTATOR OF TIME . . . . . Nelson S. Bond 90
Twentieth-century Larry Wilson and Sandra Day lead the Armageddon of the Ages against Harg, crafty ram monster-intellect, bent on warping Man to his inhuman Will!

THREE EXCITING NOVELETS OF THE LOST WORLDS

THE GIRL FROM INFINITE SMALLNESS . . . . Ray Cummings 30
The terrified Princess of Hemnar burst into a different space-sphere to find an earth-ling champion. For the vicious Tarth had thirsted the formula of transcendent growth.

MARTIAN TERROR . . . . . Ed Earl Repp 46
Lalan loved the Princess Mura, but when her desperate Venusians raised their empty fists, duty commanded the soldier to blast them to eternity with his force-bolts!

REVOLT ON THE EARTH-STAR . . . . . Carl Selwyn 71
Lonely derelict from a happier earth-age, Carver raises the revolutionary "Down with the Capitol!" And the enormous, human stockyards discharge their man-slaughters.

THREE SMASHING SHORT STORIES

THE TANTALUS DEATH . . . . . Ross Rocklynne 61
Earth denied the Red Planet's frantic H2O-plea. So began the Reign of Terror.

THE SPACE FLAME . . . . . Alexander M. Phillips 84
On that derelict space-ship, Death hissed and called and struck with tongues of flame!

THE MAN WHO KILLED THE EARTH . . . . . Ray King 94
One day Graff's brain would crack and the World would dissolve into chaos.

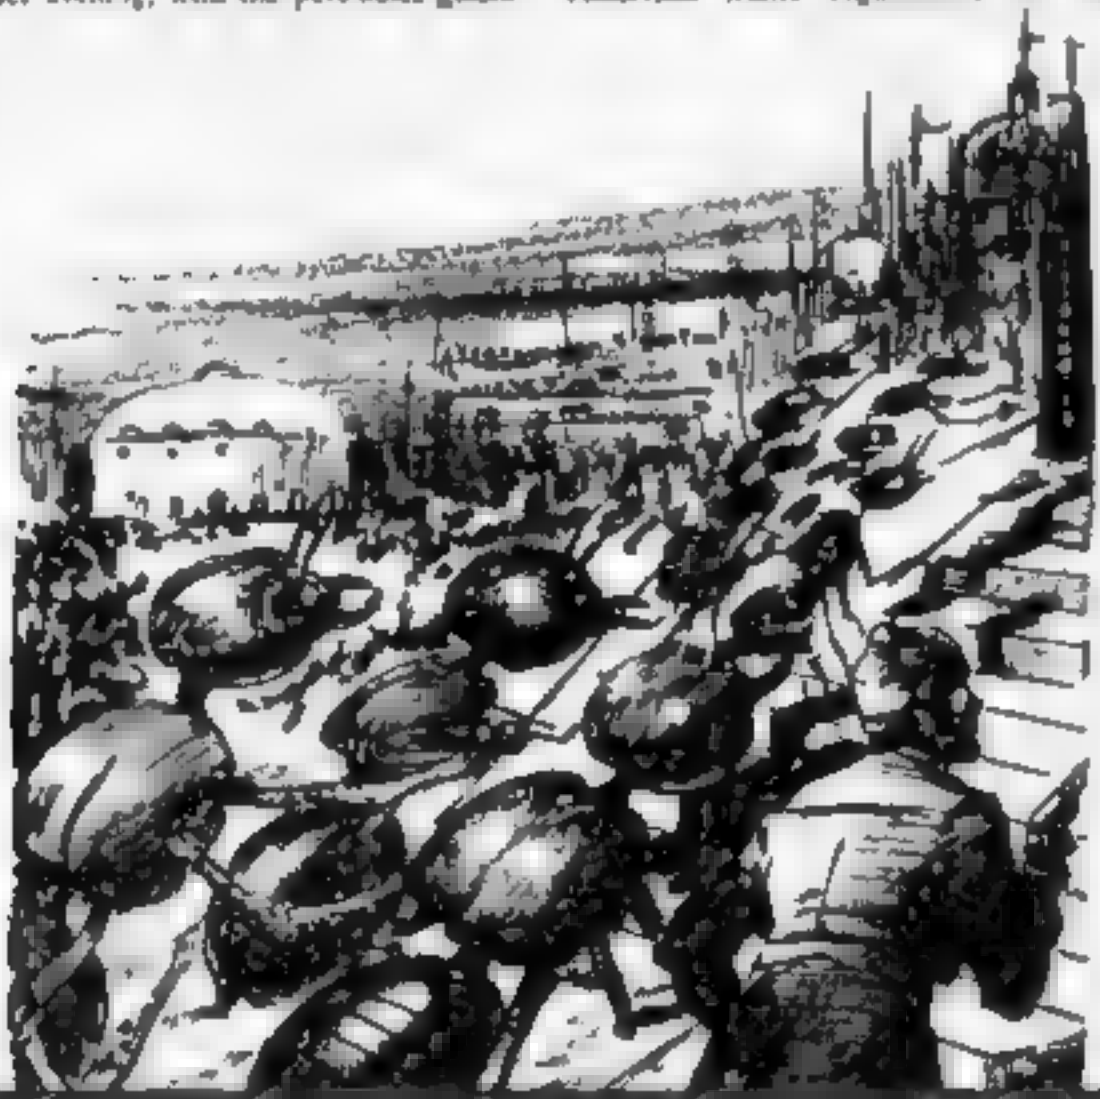
GODDESS OF THE MOON

A Complete Planet Novel

By JOHN MURRAY REYNOLDS

Death hid behind a smile in the white-and-gold city of Gral-Thala. Gibson, Earth-spy off the derelict stratheship, well knew his captive-fate. But if he died, then the Good Green planet perished from the Grey Death. . . . If he died, then died Diana, fair Goddess of the Moon.

THE Tokyo-to-New York Stratholiner swept down toward the Manhattan Municipal Airport early on a winter evening, with the port-holes gleaming all along the 300-foot length of her polished steel body. Rockets cut off well above the city in accordance with the strict American traffic regulations, she came



INTERNET ARCHIVE

In an instant the Place was in a wild turmoil. The rippling crashes of the electronic guns rang out again and again. The murky flashes of Earthmen's death rays stabbed into the fray, and a shrieking horde of insect-men charged home with spiked clubs swinging.

Black Hole
@konstructivizm

The Universe is aging, no new stars will emerge.

Data from the Euclid and Herschel space telescopes has shown that the process of new star formation in the Universe is gradually slowing. Star formation peaked approximately 10 billion years ago, and its rate has been steadily declining since then. Interstellar gas and dust, which served as the main building blocks for stellar systems, are gradually depleted, depriving galaxies of fuel for new stars.

Astrophysicists call this process the "cooling of the Universe." Galaxies are losing activity, becoming dimmer, and producing fewer stars. However, this is not the end of cosmic evolution, as vigorous star formation is being replaced by supernova explosions, galaxy collisions, and black hole activity, shaping a new face of the cosmos.

According to scientists, humanity is living in a period of the Universe's maturity, when the chaos of stellar infancy gives way to the tranquil beauty of an aging cosmos, where life has emerged for the first time, capable of observing its majesty.

My cover work lean toward realism so OF COURSE i need ref.

I can do without but it's more for my comic style,or when I draw manga character or humoristic things.

Unveiling the Invisible: Mapping Dark Matter's Shadow In this cosmic showdown, two colossal galaxy clusters collide in a spectacular display. NASA's James Webb Space Telescope pierced the veil with its near-infrared gaze, revealing a teeming swarm of galaxies and twinkling foreground stars. Meanwhile, NASA's Chandra X-ray Observatory lights up the scene with sizzling pink hues, highlighting the scorching X-rays from superheated gas.But the real enigma? That ethereal blue overlay, charting the elusive dark matter—meticulously traced by scientists harnessing Webb's razor-sharp imagery to expose what gravity whispers but light conceals.Image Credit: NASA, ESA, CSA, STScI, CXC

Galaxy NGC 7013 The spiral galaxy NGC 7013 is located in the constellation Lyra at a distance of about 40 million light-years. It was captured in a detailed image by astronomer Jonas Moiel. For the shooting, a 356-mm Doll-Kirkham catadioptric was used, which allowed for conveying the fine structures of the gas-dust clouds surrounding the galaxy's disk. The light from the stellar arms of NGC 7013 softly scatters in the cosmic dust, emphasizing its complex structure and the deep perspective of the interstellar medium.

HD 97950: The Galactic Gladiator Arena of Stellar Behemoths! Nestled in the fiery embrace of the Carina constellation, roughly 25,000 light-years from our humble Earth, HD 97950 commands the spotlight as the dense, pulsating heart of the NGC 3603 nebula—a cosmic forge where stars are born in a whirlwind of gas, dust, and radiant chaos. This isn't just any star cluster; it's a super-star powerhouse, crammed with over 50 massive O-type stars, including Wolf-Rayet titans like NGC 3603-B, a beast clocking in at 132 solar masses and shining with a luminosity 3 million times that of our Sun—enough raw power to make entire galaxies look dim by comparison! Here, in this stellar nursery, the universe's heaviest hitters collide in a spectacle of formation and evolution, offering astronomers a front-row seat to the secrets of massive star birth.

🚨 Our entire observable universe lies inside its own gravitational radius, meaning that from the outside, it would appear like a black hole. That led to a radical idea: What if the universe formed in the same way a star collapses into a black hole?

Jupiter's south pole is a stormy realm.

The Juno probe captured a stunning image of the gas giant's south pole from a distance of 52,000 km, revealing a breathtaking sight: gigantic clockwise-swirl vortices.

Their size is astounding:

• Individual cyclones are up to 1,000 kilometers in diameter.

• Wind speeds in these hurricanes are up to 350 km/h!

The image shows how each storm rotates with its own force, but together they create a remarkably stable system resembling a flower or a giant snowflake. This is further evidence of the dynamic and mysterious nature of Jupiter's atmosphere.

Webb captures jets of a newborn star in the Orion nebula.

The Webb Space Telescope has photographed the object Herbig-Haro 24. This young star is ejecting two narrow jets of hot gas in opposite directions. These jets collide with the surrounding gas and dust, creating the glowing shock waves characteristic of such objects. The star is still forming within a dense dust cocoon and has not yet completed its birth.

The object is located in the Orion B molecular cloud (one of the most active star-forming regions in our galaxy) at a distance of approximately 1,350 light-years from Earth. Observing such stars allows scientists to understand how stars are born and evolve in the early stages of their lives, as well as how planetary systems form around them.

Scientists using the James Webb Space Telescope have confirmed crystalline water ice for the first time in a dusty disk around a Sun-like star.This ice mixes with fine dust, forming a sparkling frozen zone in the young star's disk.Most ice resides in the cold outer regions, with little near the star, illustrating temperature's role in material distribution.Detecting this ice offers key insights into planet-building blocks and early system conditions.Studying ice formation helps explain water delivery to new worlds, essential for life.Webb's views reveal dust-ice interactions in stellar nurseries, glimpsing paths to habitable planets.Image Credit: NASA, ESA, CSA, STScI, Ralf Crawford (STScI)

The closest known black hole to Earth is just 1,560 light-years away.

Shining Science

💫 Deep in the heart of our galaxy, astronomers have discovered the fastest known star: S62.

Orbiting the supermassive black hole at the Milky Way's center—Sagittarius A*—this star reaches blistering speeds of over 8% the speed of light (nearly 24,000 km/s or ~53 million mph) during its closest approach. At such velocities, time dilation becomes significant—an hour for S62 would equal about 100 minutes on Earth.

S62 orbits Sagittarius A* once every 10 years, weaving a relativistic path so extreme that classical Newtonian physics can't describe it. Instead of tracing a simple ellipse, S62's path precesses—shifting like a spirograph—by about 10 degrees per orbit, a clear demonstration of general relativity in action. This behavior mirrors the famed precession of Mercury's orbit but on a dramatically larger scale.

Previously, the star S2 held the record for closest approach, providing astronomers in 2018 with a real-world test of gravitational redshift. Now, S62 presents an even better opportunity to probe Einstein's theory. As it swings close again to Sagittarius A*, astronomers hope to extract new insights into the nature of gravity and the extreme environment near our galaxy's central black hole.

Behold: the Phantom Galaxy, Messier 74, so perfect it looks like the universe hired a graphic designer.Out in the quiet waters of Pisces, 32 million light-years away, floats this flawless grand-design spiral. Two arms curl out with almost arrogant symmetry, as if the cosmos looked at every other galaxy and said, “Hold my coffee, watch how it’s done.” It’s roughly the size of our own Milky Way (95,000 light-years across), but where we’re a chaotic, bar-filled mess, M74 is pure elegance, the galactic equivalent of walking into a party in a perfectly tailored tux.This image is a cosmic collab of the century: Hubble brings the razor-sharp visible-light details, tracing starlight like golden threads,
JWST dives into the infrared, revealing hidden nurseries of newborn stars glowing like embers under a blanket,
Chandra lights up the X-ray skeletons: super-hot gas, feeding black holes, and the ghosts of exploded stars in electric blue.

The result? A spiral so hauntingly beautiful it earned the nickname “Phantom,” because when you stare too long, you start questioning whether something this pristine can even be real.M74 isn’t just a galaxy. It’s the universe flexing.(Image: NASA/ESA Hubble Space Telescope | NASA/CSA James Webb Space Telescope | Chandra X-ray Observatory

Galactic Monster Mash: When Clusters CollideEight billion light-years away, something truly apocalyptic is unfolding.Galaxy cluster eMACS J1353.7+4329 isn't one cluster. It's several titanic clusters smashing into each other at millions of kilometers per hour, slowly fusing into a single cosmic leviathan.The combined mass is so obscene that it warps spacetime like a bowling ball on a trampoline. Light from galaxies behind the collision gets bent, stretched, and duplicated into shimmering arcs, rings, and ghostly duplicates (nature's own funhouse mirror).This is strong gravitational lensing on steroids, turning the whole scene into a glowing hall of cosmic horrors.Hubble caught this beast in the act as part of the "Monsters in the Making" program, scouting the most violent mergers in the universe so the James Webb Space Telescope can later zoom in and watch the carnage in infrared glory.What you're seeing isn't just a pretty picture. It's the violent birth of one of the largest structures in the cosmos.The universe doesn't do gentle. It does metal. ESA/Hubble & NASA, Acknowledgement: H. Ebeling

@konstructivizm

NGC 6789 is one of those discoveries that makes astronomers rewrite the footnotes in their textbooks.Most dwarf galaxies in cosmic voids are supposed to be “dead”: ancient, red, and starved of the cold hydrogen gas needed to make new stars. The Local Void — the enormous under-dense bubble we sit near — is especially so. It’s roughly 150–200 million light-years across and contains ~60 % fewer galaxies than average cosmic real estate. Anything living there should have run out of star-forming fuel billions of years ago.Yet when researchers looked at NGC 6789 with the Canada-France-Hawaii Telescope and follow-up spectroscopy, they found bright, blue star clusters and H II regions glowing with ionized hydrogen — clear signs of stars born in the last few hundred million years. Roughly 4 % of its stellar mass is that young, which is astonishing for a void dweller.The two leading (and both uncomfortable) explanations right now are:Primordial gas preservation: Somehow this tiny galaxy kept a reservoir of pristine, metal-poor hydrogen untouched for 13 billion years, shielded from the usual heating and expulsion mechanisms. That’s extremely hard to do without dark-matter dynamics we don’t fully understand.
Late-time accretion from the void: Extremely diffuse filaments of intergalactic gas — too thin to see directly — might be trickling in and shocking into star-forming clouds when they hit the galaxy. That would require the void to be less empty than our current models predict.

Either way, NGC 6789 is a living counterexample to the idea that environment completely dictates destiny. It’s a stubborn little galaxy that refused to die in the cosmic desert.Discoveries like this are why voids, once dismissed as boring, are now some of the most exciting frontiers in extragalactic astronomy. Sometimes the universe keeps its best secrets in the emptiest places.

⚫ Black holes aren't just cosmic vacuums — they're engines.

For the first time, astronomers have mapped the magnetic field around a black hole with stunning clarity.
The new image shows twisted, spiraling field lines pulling matter inward — and launching planet-sized jets that blast across entire galaxies.

What scientists are seeing now finally matches theories built over decades.
Every new picture brings us one step closer to understanding how black holes shape the universe itself.

Astronomers Captured a Black Hole's Magnetic Field Clearly For the First Time.

Keep up with my Patreon Account

Hi Member Gang!

Quick Update! Whoa! I launched the subscription tiers, I offered a special discount. The platform doesn't allow me to remove that discount, so I'll be opening a new subscription tier at the regular price.

Starting December, the discounted tier will be disabled. If you'd like to keep access to all content and future updates, please switch to the new plan.

Thank you so much for your support! If you have any questions, feel free to message me.

Don't have a Patreon and want to support my work? Consider supporting me on Ko-fi! Every little bit helps and is greatly appreciated!

Haha please I will tell you everything hahahah just please stop tickling me! Oh my gahahahahd this is my only weakness.
